# THEANINE

200 mg of Soothing Theanine  
Calm Relaxed Focus – Naturally

Dietary Supplement | **360** Easy-to-Swallow Capsules

**Andrew Lessman's THEANINE** provides 200 mg of pure Theanine – one of the most uniquely beneficial and unusual of amino acids. First of all, unlike other amino acids, Theanine is not a building block of protein, but is almost exclusively found in the tea plant (*Camellia sinensis*) where it accounts for both its distinctive flavor, as well as its unique calming properties. Plus, because Theanine can cross the blood brain barrier, it can deliver its beneficial properties directly to the brain and nervous system. Theanine has been shown to enhance alpha brain-wave activity, which is associated with a relaxed, but still focused and alert state. Theanine promotes the production of the neurotransmitters dopamine and serotonin, which support relaxation and calm. The observation that the caffeine in green tea is less intense than that of coffee results from green tea's abundance of Theanine. In fact, Theanine is often used to reduce the uncomfortable effects of caffeine and to support a relaxed state. Theanine can also help to diminish perceived stress and tension while promoting calm attention and focus. In short, Theanine naturally supports the brain and its neurotransmitters promoting calm, relaxed focus without drowsiness.

# VITAMIN D<sub>3</sub> 2000™

2,000 IU VITAMIN D<sub>3</sub> (CHOLECALCIFEROL)  
100 MG CALCIUM • 50 MG MAGNESIUM

DIETARY SUPPLEMENT

**PROCAPS**  
LABORATORIES

**ALL-SOLAR**  
MANUFACTURING

720 Easy-to-Swallow Capsules

**Andrew Lessman's VITAMIN D<sub>3</sub> 2000** contains 2,000 IU of Vitamin D<sub>3</sub> in its most active and beneficial form – Cholecalciferol. Overwhelming scientific research has validated Vitamin D<sub>3</sub> as the single most important vitamin to supplement. We also combine our Vitamin D with Calcium and Magnesium, because of their shared role in bone health. In fact, Calcium cannot be absorbed without adequate Vitamin D, thus making Vitamin D just as important as Calcium for bone health. That should be enough to encourage everyone to consume extra Vitamin D, but it is Vitamin D's other exciting benefits that are making headlines and have experts urgently seeking to raise the recommended intake of Vitamin D. The body can only produce small amounts of Vitamin D when exposed to sunlight (UV radiation), but reduced sun exposure and increased use of sunscreens, as well as the normal aging process, makes our own internal production of Vitamin D extremely limited and unreliable. Moreover, Vitamin D is not readily available in food – only present in small amounts in some fish and eggs. As a result, for over 30 years, **ProCaps** has always provided extra Vitamin D in all of our multivitamins and Calcium products. An enormous amount of recent research has confirmed the wisdom and necessity of consuming extra Vitamin D, and with our **Vitamin D<sub>3</sub> 2000** you receive the benefits of the most active form of Vitamin D, plus a bonus of essential Calcium and Magnesium.
