Andrew Lessman's CARNISLIM 1250 is designed to safely support and promote fat-burning and energy metabolism. **CarniSlim 1250** contains no deceptive weight-loss ingredients and instead, its comprehensive, science-based formula begins with our highest levels of Carnitine (1250 mg) – a nutrient essential for ALL fat-burning metabolism. Pure Carnitine is a liquid, so it only makes sense that the highest potency Carnitine formula would be a liquid and thereby eliminate the need to swallow several pills per day. Carnitine is required for all fat metabolism to take place in your body because it is an integral part of the system that must move and transfer all body fat to the precise location in your cells where it can be burned. Not surprisingly, the highest levels of Carnitine are found in those body tissues required to perform the greatest amount of fat and energy metabolism. In fact, over 98% of the body's Carnitine is found in the heart and hard-working skeletal muscles. Because carbohydrates play an important role in increasing fat storage, **CarniSlim 1250** supplies Chromium and Vanadium to support healthy carbohydrate metabolism. We also include the B-Complex vitamins because of their essential role in all fat and energy metabolism. The sacrifices we make when dieting deserve the best results, and **CarniSlim 1250** is designed to safely provide the science-based, comprehensive nutritional support to help us achieve our weight-loss goals.
