ULTIMATE GAMMA VITAMIN E™

500 mg Gamma Tocopherol
600 mg Total Tocopherols

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's ULTIMATE GAMMA VITAMIN E is a unique approach to natural Vitamin E providing ultra-high levels of more protective Gamma Vitamin E (500 mg), instead of the alpha Vitamin E of typical formulas. For good reason, Vitamin E is among the most popular separate supplements, but unfortunately, typical formulas contain less protective, synthetic Alpha Tocopherol. Our Ultimate Gamma Vitamin E focuses on Gamma Tocopherol – the most protective of the four naturally occurring tocopherols. Gamma Vitamin E is not available in typical Vitamin E formulas, despite its being the most predominant and protective form in nature. The Vitamin E content of our diet is extremely low, yet typical supplements bear little resemblance to the forms of Vitamin E found in nature. Our **Ultimate Gamma Vitamin E** is truly complete and uniquely natural focusing on 500 mg of Gamma Tocopherol – Mother Nature's most predominant and protective form of Vitamin E, along with 100 mg of Alpha, Beta and Delta Tocopherols. Don't be fooled by so-called natural Vitamin E or mixed tocopherol formulas that deliver little natural Vitamin E in its most protective natural form – **Gamma Tocopherol**.
