VITAMIN K₂ MK-7 -50-

HIGHEST ACTIVITY VITAMIN K₂
PROMOTES BONE AND HEART HEALTH

DIETARY SUPPLEMENT

360 Easy-to-Swallow Capsules

Andrew Lessman's VITAMIN K₂ MK-7 50 provides a high potency blend of Vitamin K in the form of Vitamin K-1 (Phytonadione) and, most importantly, as Vitamin K-2 Menaquinone-7 (MK-7) to deliver newly recognized and essential benefits to bone and heart health. Vitamin K's name originates from the role of Vitamin K-1 in blood clotting (Koagulation in German) but, today, its most important function centers around Vitamin K-2 MK-7 and its now recognized role in the utilization of Calcium within the body and, as a result, its indispensable role in both bone health, as well as heart and cardiovascular health. These far-reaching benefits to skeletal and cardiovascular health have now been consistently observed and established in the scientific literature. Our **Vitamin K₂ MK-7 50** is formulated to deliver an unsurpassed source of Vitamin K-2 for optimum bone and heart health. Plus, for any person consuming Calcium and Vitamin D, Vitamin K-2 MK-7 has been shown to ensure the greatest benefits of those essential nutrients. It is also important to note that the best source of Vitamin K-2 is the unusual Japanese food called fermented natto from soybeans, which virtually no Americans consume. Fortunately, our **Vitamin K₂ MK-7 50** makes it easy and economical to obtain all the benefits of Vitamin K-2 in a small easy-to-swallow capsule.
