180 Easy-to-Swallow Capsules

Andrew Lessman's FRIENDLY FLORA is our unique, comprehensive blend of five strains of Probiotic (*Friendly Flora*) species, delivering a remarkable 5 Billion Colony Forming Units (CFU) per capsule. It is intended to enhance and promote the population of beneficial *Friendly Flora* (healthy microorganisms) throughout our body, particularly to support our digestive, immune, urinary and genital systems. Probiotic means "for life" and Probiotics have been naturally and beneficially consumed for thousands of years. It is well established that the *Friendly Flora* that populate our GI (gastrointestinal) tract play a vital role in promoting healthy digestive function; as well as enhancing our ability to absorb key nutrients and maintaining healthy immune status. **Friendly Flora** provides five carefully selected varieties of microflora, each possessing its own unique properties, since a diverse and balanced population of *Friendly Flora* is required for optimum benefits. The delicate balance of microflora in our digestive system is easily upset by daily stress, digestive issues and normal aging. This fragile balance is further disrupted by medications that affect the digestive system, including antacids or even worse, antibiotics, which can wipe out our *Friendly Flora*. The most common source of microflora in the diet is yogurt, but it generally contains low and unreliable levels of just a single strain, and yogurt can present digestive issues, along with unwanted sugar and calories. Our **Friendly Flora** provides a remarkable 5 Billion CFU (Colony Forming Units) per capsule of five distinct varieties of *Friendly Flora* specially selected for their unique stability and bioavailability. The result is a uniquely comprehensive formula that retains its potency to ensure the benefits you seek for all the body systems that depend on *Friendly Flora*.
