CARNISLIM 250™

250 mg Carnitine as Acetyl L-Carnitine

Required for All Fat Metabolism
Essential Support for Brain and Heart

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's CARNISLIM 250 provides a superior source of Carnitine – the central molecule for *all* fat burning metabolism. **CarniSlim 250** is designed to safely promote fat-burning and energy metabolism while also supporting heart and brain health. **CarniSlim 250** delivers high levels of Acetyl L-Carnitine (ALC), the most versatile source of Carnitine, which is required to transport ALL fat to the site within each cell where it is burned. Not surprisingly, the highest levels of Carnitine are found in organs performing the most fat and energy metabolism, including our brain, heart and muscles, where 98% of the body's Carnitine is present. A healthy brain requires an enormous, uninterrupted supply of energy, and Acetyl L-Carnitine has been specifically recognized for its beneficial role supporting the brain's energy reserves, while also promoting acetylcholine synthesis (our primary neurotransmitter). We enhance this formula's efficacy by including two essential building blocks for Carnitine synthesis, Lysine and Vitamin C, as well as a full B-Complex, including our unique Methyl B12. **CarniSlim 250** is designed to provide science-based support for fat and energy metabolism while also supporting heart and brain function.
