ENERGY & FAT METABOLISM FACTORS™

COMPREHENSIVE NUTRIENT SUPPORT
PROMOTES OPTIMUM METABOLIC ACTIVITY

DIETARY SUPPLEMENT

360 Easy-to-Swallow Capsules

Andrew Lessman's ENERGY AND FAT METABOLISM FACTORS is designed to safely enhance energy levels and promote fat burning metabolism while also providing a general sense of well-being. Most importantly, unlike typical formulas, it does so without deceptive or harmful ingredients. This formula's comprehensive fat-burning support begins with optimum levels of **B-Complex Vitamins**, along with trace minerals such as **Chromium**, as well as all-important **Carnitine**, without which, *no fat* could be transported or burned. This formula also includes **Lysine** and **Vitamin C** to further support your body's internal production of essential **Carnitine**. We also provide extracts of **Green Tea** and **Guarana** as mild, natural sources of caffeine-related compounds. These botanicals have a long history of traditional use to enhance energy and well-being. To further combat fatigue and promote feelings of well-being, we also include standardized extracts of the adaptogenic herbs, **Panax Ginseng**, **Eleutherococcus**, and **Ashwagandha**. These plant extracts have long been used to support the body's ability to adapt and recover from physical and mental stress, such as diet, exercise and weight-loss. These nutrients and extracts can help us compensate for the natural slowing of our body's metabolism and the fatigue that occurs when we diet, exercise and reduce our caloric intake. We also include the branched chain amino acids **Leucine**, **Isoleucine** and **Valine** because of their role in preserving lean muscle tissue during exercise. In short, our **Energy and Fat Metabolism Factors** supplies natural tools to help you safely maximize your weight-loss potential when you have made the commitment to lose weight via a sensible regime of diet and exercise.
