CRANBERRY with D-MANNANOSE

Bladder | Kidney
Urinary Tract Support

Dietary Supplement | **240** Easy-to-Swallow Capsules

Andrew Lessman's CRANBERRY with D-MANNANOSE combines 500 mg of our standardized Cranberry extract with 500 mg of D-Mannose to create the most comprehensive support for bladder, kidneys and urinary tract health. Cranberry has been used traditionally for centuries to promote the health of the bladder, kidneys and urinary tract and in recent decades, clinical studies have validated its extensive benefits. Our Cranberry is standardized to deliver high levels of protective compounds to support and promote a healthy pH and microbiome in the bladder and urinary tract. D-Mannose is a naturally occurring simple sugar present in trace amounts in many fruits and vegetables. D-Mannose has been the subject of extensive clinical study that has demonstrated its ability to support the health of the urinary tract and bladder. Research has shown that its benefits stem from its ability to promote a healthy environment and microbiome in the bladder and urinary tract. D-Mannose is not metabolized like a typical sugar, so it will not interfere with healthy blood sugar balance. In short, our Cranberry with D-Mannose combines to create the most comprehensive, natural support for bladder, kidney and urinary tract health.
